# Solution to Five in a Row
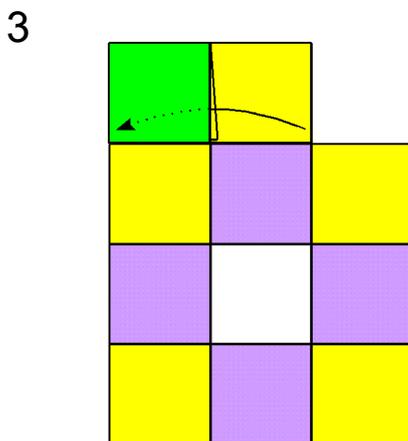

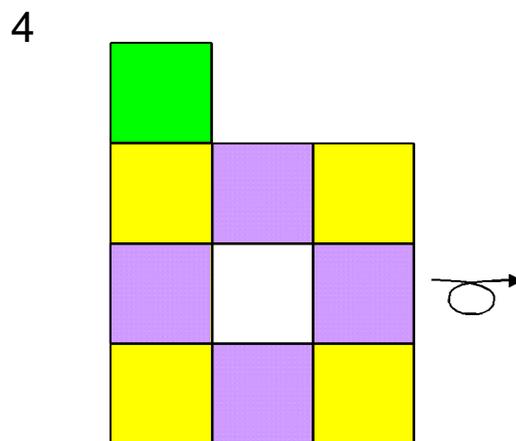

1

2

1. Fold the top edge of the puzzle downwards.

2. Fold the left part of the puzzle across to the right.
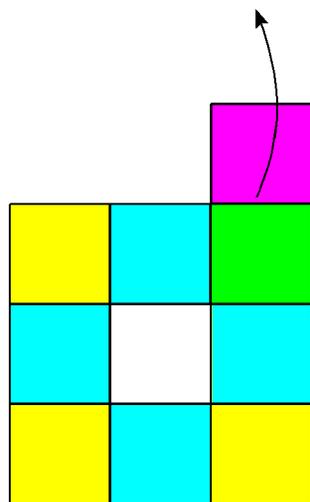

3

4

3. Fold the back layers across to the right tucking them into the pocket in front of them as you do so.
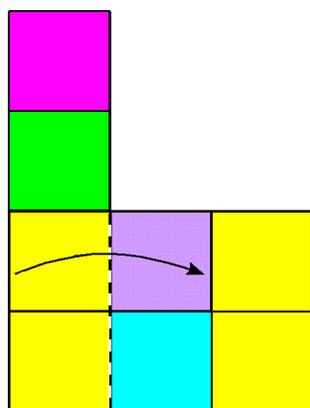

4. Turn over sideways.

5

5. Fold the front layers upwards.

6

6. Turn over sideways.

7

7. Fold the left edge across to the right.
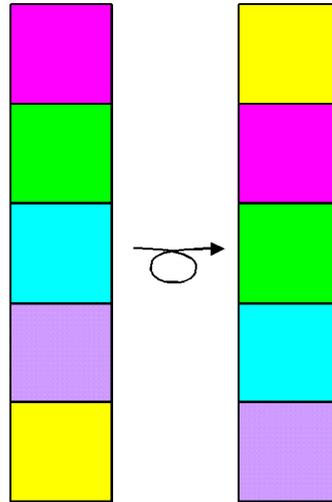

8

8. Fold the left edge inwards, tucking it into the pocket between the layers on the left hand side.

9

9. Fold the front layers downwards.

10

10. Five in a Row is solved. A second solution can be found on the other side.
