

Folio

Designed by David Mitchell

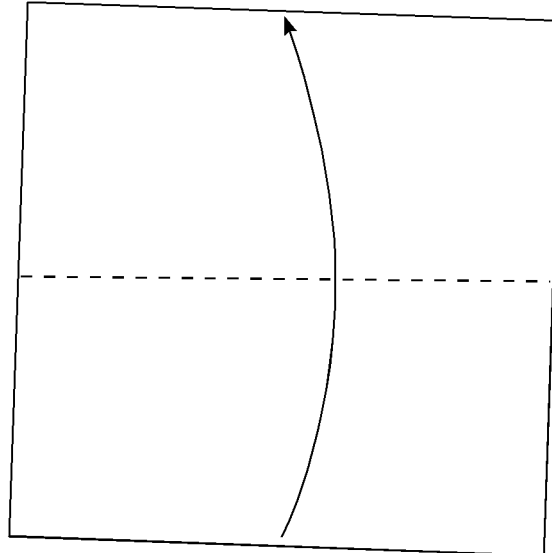

Folio is a minimalist design which uses just four active folds.

Folio was designed in 2000.

You will need a square sheet of irogami. Begin with your paper arranged white side up.

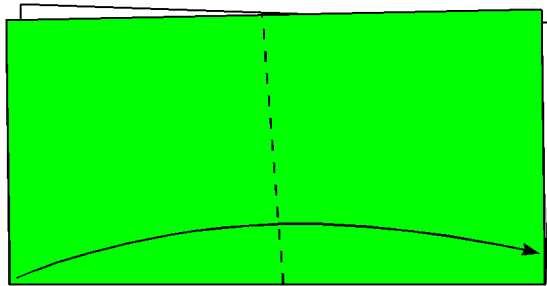

1

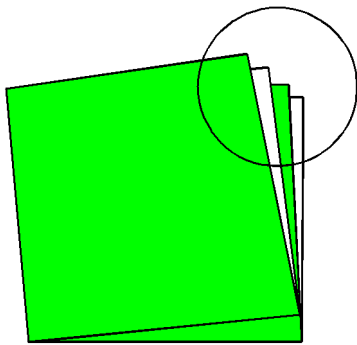

1. Fold in half upwards so that the result looks like picture 2. Ideally the crease should pass through the exact centre of the square.

2

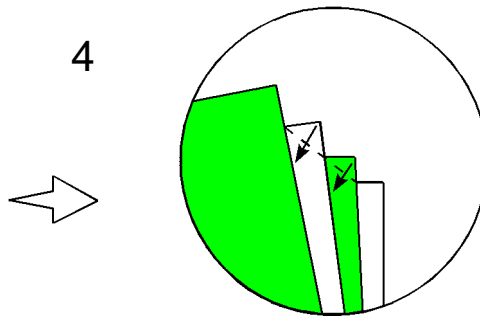

2. Fold in half sideways so that the result looks like picture 3. Ideally this crease should also pass through the exact centre of the square.

3

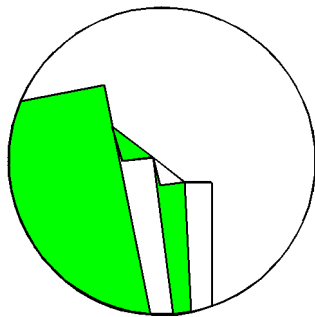

3. This is the result. The next picture shows the detail of the area inside the circle.

4

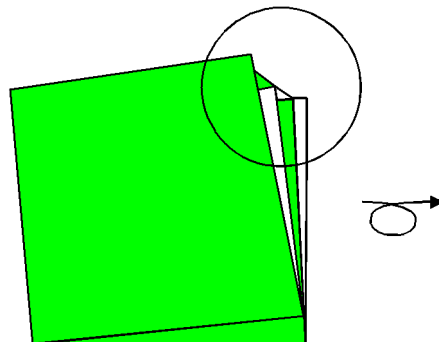

4. There are four small corners in a row here. Fold the tips of the centre two inwards.

5

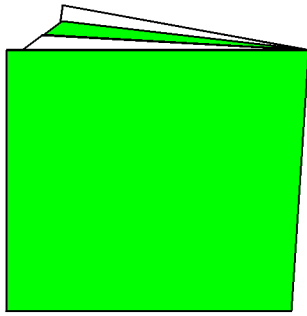

5. Make sure that the newly folded edges are aligned with each other.

6

6. Turn over sideways.

7

7. Folio is finished.
