

Kamikaze

Designed by David Mitchell

Kamikaze is an adaptation of the traditional Business Card Frog that can be folded from ordinary square origami paper, sometimes known as kami, which is just the normal Japanese word for paper. It jumps surprisingly well.

Begin folding with your paper arranged white side up.

1. Fold in half sideways, then unfold.

2. Fold both outside edges into the centre.

3. Fold the top right and bottom left corners diagonally inwards, then unfold.

4. Fold the top left and bottom right corners inwards, then unfold.

5

5. Turn over sideways.

6

6. Fold both the top and bottom edges into the centre, using the points where the diagonal creases meet to locate these folds.

7

7. Turn over sideways.

8

8. Fold the central edges outwards, then unfold, to create two small vertical creases within the square delineated by the diagonal creases.

9

9. Collapse the top half of the design into a waterbomb base.

10

10. Fold in half upwards.

11

11. Fold the top edge of the front layers downwards using the existing crease. The next picture is on a larger scale.

12

12. Fold the right point of the front layers across to the left using the existing crease.

13

13. Fold the bottom right corner of the front layers across to the left then flatten the paper by folding the right edge of the back layers onto the vertical centre crease. The result will look like picture 14.

14

14. Fold the bottom right sloping edge onto the vertical centre crease.

15

15. Fold both the left front flaps back across to the right.

16

16. Repeat steps 13, 14 and 15 on the left half of the paper.

17

17. Fold the outside points of the top front flaps up to the top. Also fold the outside edges of the bottom front flaps into the centre.

18

18. Fold all four of the top and bottom front flaps in half outwards.

19

19. Fold the centre of the bottom edge into the centre of the design. Do not completely flatten the crease. There should still be some spring in the paper.

20

20. Fold the top edge of the bottom front layers onto the bottom edge. Do not completely flatten the crease. There should still be some spring in the paper.

21

21. Open out the top front flaps at right angles. Turn over and arrange to look like picture 21.

21

21. Kamikaze is finished. Compress and release the rear legs to see him jump.
