

Standing Heart

Designed by David Mitchell

This Standing Heart is a very simple but effective design that easily lends itself to adaptation and variation.

Standing Heart was designed in 1995.

You will need a single square of paper of any kind. If you are using irogami begin with your paper arranged white side up.

1

1. Fold in half sideways, then unfold.

2

2. Fold in half downwards.

3

4

3. Fold both outside edges into the centre. The next picture is on a larger scale.

4. Turn over sideways.

5

6

5. Fold both bottom corners into the Centre using the vertical centre crease as a guide.

6. Fold the front layers of the top edge downwards as shown and squash to look like picture 7.

7

8

7. Fold both inside top corners diagonally outwards using the folded edge below them as a guide.

8. Open out the folds made in step 5 by about 120 degrees.

9

9. Turn over sideways.

10

10. Adjust the angles of the bottom flaps so that the heart stands easily on a flat surface. The Standing Heart is finished.

2A

11. Alternatively open out the paper after step 2 and cut into two halves along the horizontal crease.

2B

12. Either or both these halves can be turned into a Standing Heart by following steps 3 through 9.
