

Solution to the Cross Motif from Merlin's Mat

1

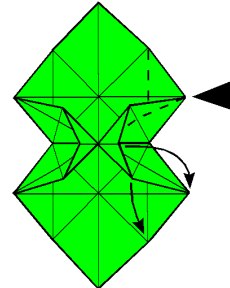

1. Fold both outside corners to the top to collapse the mat into the shape shown in picture 2.

2

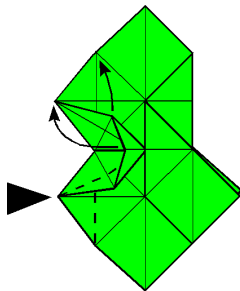

2. Fold the front layer downwards but don't squash the inside layers yet.

3

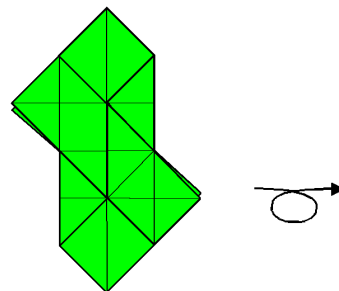

3. Squash the right hand inside layers flat so that they look like picture 4.

4

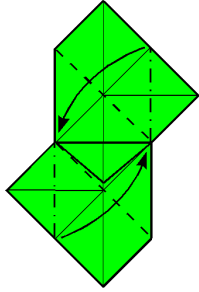

4. Do the same thing to the left hand inside layers.

5

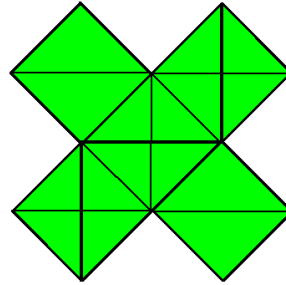

5. This is the result. Turn over sideways.

6

7

6. Fold the top right and bottom left sloping edges inwards so that the central front flap is hidden beneath them. It doesn't matter which order you make these folds in.

7. The Cross motif has been achieved.
