# Solution to Three in a Row
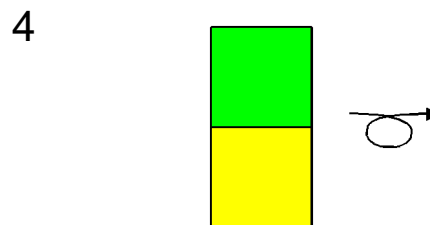

1

**1. Fold the top third of the puzzle downwards.**

2

**2. Fold the right hand third of the puzzle inwards.**

3

3. Fold the left half of the puzzle across to the right tucking it in between the front two layers as you do so.
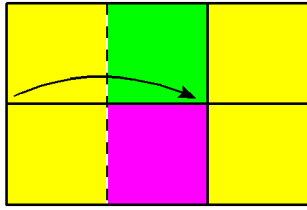

4

4. Turn over sideways.
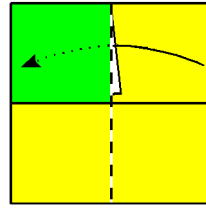

5

5. Fold the front layers upwards.

6

**6. You have solved Three in a Row.**

7

7. Alternatively you can also solve the puzzle by folding the left hand third of the puzzle inwards ...

8

8. ... then folding the right half of the puzzle across to the left tucking it in between the front two layers as you do so.

9

9. You can then continue with steps, 4 and 5 to solve the puzzle.
