

Wot No Undies?

Designed by David Mitchell

Wot No Undies? is a see-through double image design showing the famous World War 2 and Fifties graffiti figure of Chad, who used to comment on shortages. Wot No Petrol?, for instance. Here he is seen, as he normally was, peering over a wall. When held up to the light, this design reveals that, behind the wall, he is completely naked.

Wot No Undies? was designed in 2011.

You will need a single square of irogami in a suitable colour. Begin with your paper arranged coloured side up.

1. Fold in half diagonally, then unfold.

2. Fold in half diagonally in the alternate direction, then unfold.

3

3. Fold both outside corners into the centre.

4

4. Turn over sideways.

5

5. Fold the other two corners into the centre as well.

6

6. Fold the top front layer in half diagonally upwards, then unfold.

2

David Mitchell / Wot No Undies?

7

7. Do the same thing in the other direction.

8

8. Remake the last two folds and flatten the resulting flap so that it points to the left. Picture 9 shows you what the result

9

9. Fold the small front flap across to the right.

10

10. Lift this flap up at right angles, separate the layers and squash symmetrically.

11

11. Open out the top flap.

12

12. Fold the top point downwards so that the ends of the creases marked with circles end up on the sloping edges of the bottom front layer. Picture 13 shows what this will look like.

13

13. Make sure the creases and edges line up at the points marked with circles then make a concertina fold in the top part of

14

14. Refold the front flap into the form

15

15. Swing the top layers upwards using the existing crease.

16

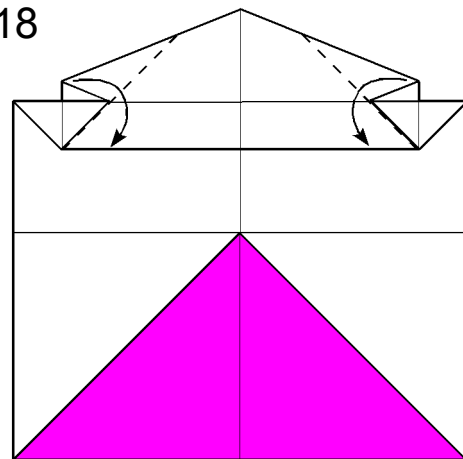

16. Fold both bottom corners of the concertina fold inwards, then unfold.

17

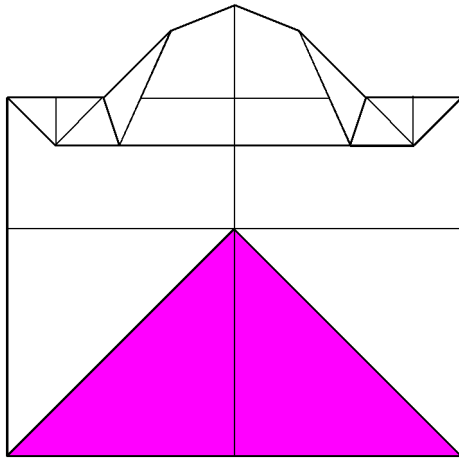

17. Fold both outside edges of the front layer inwards so that small triangular facets are formed. These facets are outlined by the creases made in step 16.

18

18. Turn part of both top sloping edges inside out between the other layers, making sure that the new creases are aligned to the inside edges of the triangular facets.

19

19. Turn over sideways.

20

20. Lift out the hidden flaps.

21

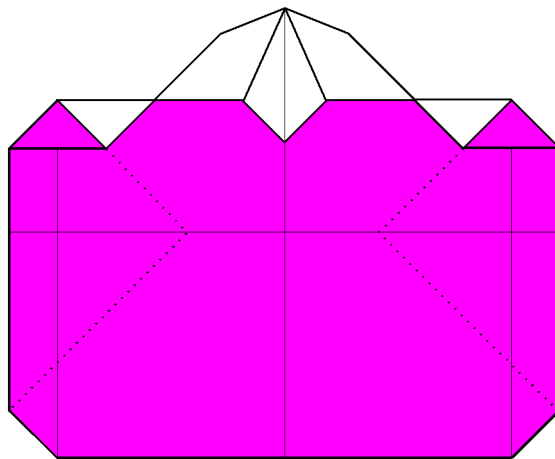

21. Fold both front flaps outwards, making sure that the horizontal centre creases of all parts of the paper remain aligned.

22

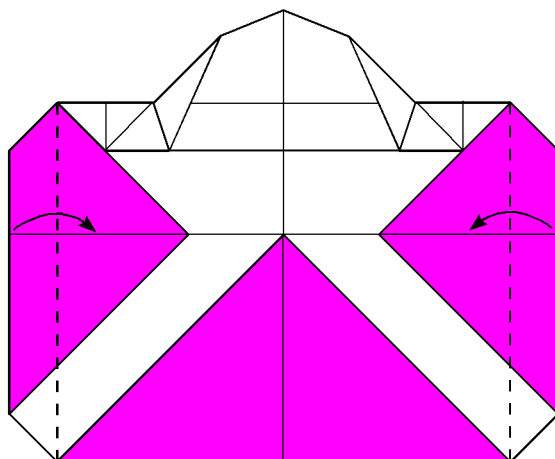

22. Swing both outside flaps to the back using the existing creases, which are marked with dotted lines, then flatten the paper as shown in picture 23.

23

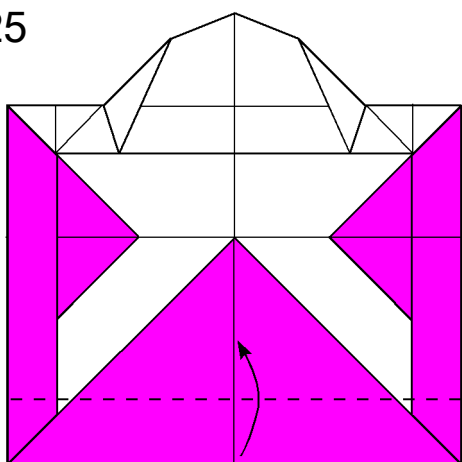

23. The dotted lines show the new position of the hidden flaps. This is Chad. Turn over sideways.

24

24. Fold both sides inwards as shown, making sure the creases are parallel to the outside edges.

25

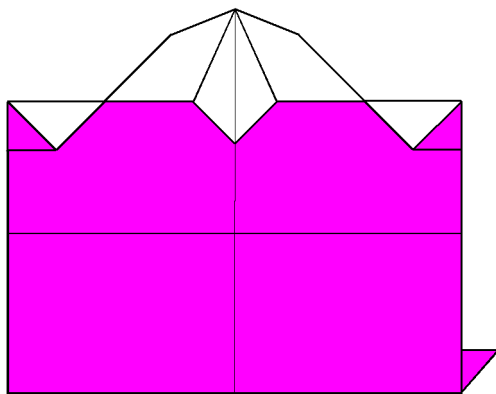

25. Fold the bottom edge upwards as shown.

26

26. Open the front bottom flap out at right angles to create a stand. It is crucial that the triangular flap behind it remains in contact with the main part of the paper. If it curls towards you, you may need to use a tiny dab of glue to fix it in place, Careful folding can avoid the need for this however.

27

27. The folding is done. Stand him in front of a light source.
